

Using Clyp.it

Set up a Clyp.it account

Go to clyp.it and click on 'Sign up'

A screenshot of the Clyp.it sign-up form. At the top, there is a blue button with the Facebook logo and the text 'Sign up with Facebook'. Below this, the word 'or' is centered between two horizontal lines. There are three input fields: 'Name', 'Email Address', and 'Password'. Below the input fields, there is a checked checkbox with the text 'Tell me about Clyp news'. Underneath, there is a line of text: 'By signing up, I agree to Clyp's [Terms of Service](#) and [Privacy Policy](#).' Below that, another line of text: 'This site is protected by reCAPTCHA and the Google [Privacy Policy](#) and [Terms of Service](#) apply.' At the bottom, there is a large yellow 'Sign Up' button and a link that says 'Already have an account? [Log in](#)'.

You may need to verify your email address before you do anything else, by clicking on a link in an email sent to you.

Record your Voice

The next step is to click on 'Upload a Clip'.

This gives you the choice of uploading a voice file that you've created using a different voice recorder and saved somewhere, or recording directly here in Clyp.it

This is what you get when you select the 'Record' tab:

To record your voice, click on the big yellow button. You will initially have to give Clyp.it permission to use your microphone:

The yellow circle changes to a square while you record, and you click on that when you're finished. It will show you the screen below with the number indicating the length of your sound file, and giving you the choice of discarding it or uploading it.

Click on 'Upload' and wait for it to finish. You'll then see a screen where you can add details about your file:

A screenshot of a file upload details form. On the left, there is a dashed box for adding a photo with a camera icon and the text 'Add photo'. Below this are two checkboxes: 'Comments' (checked) with the text 'Anyone will be able to comment' and 'Downloads' (unchecked) with the text 'No one will be able to download'. At the bottom left is a red 'Delete' button. On the right, there is a light blue input field containing 'deborah@saysomethingin.com'. Below it is a large white text area for 'Add a description' with a '0/420' character count at the bottom right. Underneath is a white input field with the text 'Upgrade to add a custom URL'. Below that is a 'Preview: clyp.it/gumohpl3' link. At the bottom right, there are radio buttons for 'This Clyp is:' with 'Public' selected and 'Unlisted' unselected. A yellow 'Save' button is at the bottom right.

You can leave the file as 'Public' or make it 'Unlisted' which means that people can't just find it by searching randomly, but SSIWers can click on the link you post on the forum and listen there.

After clicking on 'Save' you will see:

The screenshot shows a Clyp post interface. At the top left, there is a profile picture of a woman and the name "Deborah". Below the name is the email address "deborah@saysomethingin.com". Underneath the email is the text "Test file to see how this works" and "posted less than a minute ago". To the right of the post, there is a play button icon followed by the number "0". Below the play button is a button labeled "Edit details". At the bottom left of the post, there is a button labeled "+ Save". In the center of the post, there is a grey box with the text "Comments are disabled for this Clyp.". At the bottom right of the post, there is a section labeled "DIRECT LINK" with a text box containing the URL "https://clyp.it/gumohpl3?token=0b9a68d679".

The URL address in the box 'DIRECT LINK' is what you then copy and paste into the relevant place in the forum – according to which task you're doing.
